

CARRIER SYSTEMS 2013/2014

Atera

ATERA CARRIER SYSTEMS
STAND FOR
HIGHEST DEMANDS,
TECHNICAL INNOVATION,
AND FUNCTIONAL AESTHETICS.

WHETHER IT IS ABOUT
THE TRANSPORT
OF BICYCLES,
SKIS AND BOARDS,
CANOES AND SURFBOARDS,
ROOF BOXES, OR THE
ATERA WORK SERIES.

ATERA PRODUCTS ARE THE
OUTSTANDING RESULT
OF GERMAN DESIGN
AND ENGINEERING,
MANUFACTURED
IN LEUTKIRCH IM ALLGÄU.

ATERA – FOR A SAFE AND RELAXED JOURNEY FROM THE START.

Let's get ready to go! Atera is always coming along with you. Whatever the time of year, Atera always has the right carrier system for your destination. Atera roof boxes will make your summer holidays so much easier to organise, and your winter holiday fun also starts with an Atera roof box or ski carrier.

A great selection of bike carriers for tow bar mounting is waiting for bike enthusiasts, whether singles or families. We also have streamlined bike racks to carry the bikes on the roof.

The Atera Signo roof bars are the solid platform for anything you want to carry. In 2013 we are introducing a unique new roof bar range. The new Signo RT with Aero Profile and the Signo RT foot derives from the fusion of aesthetics and function. The reduced air drag and fuel consumption are impressive as well as the further developed stability and safety.

The systematic selection of high grade materials and the professional workmanship are decisive features for the quality and durability of our products. Shapely, anodised functional aluminium profiles and high-tech glass fibre-reinforced components give a unique look, high stability and a high level of safety reserves to each Atera product – even in exceptional situations.

Not without good reason have Atera carrier systems been test winners on several occasions in recent years; they are recommended by experts. The relentless pursuit of continuous improvement, the passion, determination and ambition to create the perfect transport solution, is our motivation.

What nobody can see, but what is also an important part of Atera carrier systems, is the full compliance with the strict standards of the automotive industry as well as international standards for security and environmental protection.

Atera's comprehensive automotive quality management system guarantees the constant process safety in production and long-lasting satisfaction with our carrier systems. Certificated quality, Made in Germany.

In spite of all these thoughts about technology and safety we do not lose sight of our basic goal: Your enjoyable leisure activities. The fun really starts when you load your gear – and this is what matters!

We wish you many pleasant journeys.
Yours faithfully Martin Baumeister

The new Atera Strada Vario can be folded to the compact size of 63 x 39 cm and stowed in the boot in a matter of seconds.

ROOF RACKS

SIGNO

The perfect fit for each car

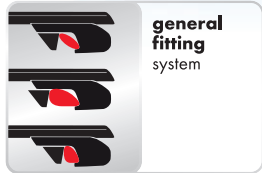

Signo stands for precision and stability and provides the solid platform for the Atera Sport carriers and the Atera Work programme. The swivelling support feet ensures the perfect horizontal alignment of the cross bars to each other – a special design achievement, which clearly shows that Atera sets a high value on optimal transport conditions and clean design.

The integral design of the Signo series is the ideal partner for any type of vehicle. The Signo range provides the perfect match for any vehicle whether rail, fix point, clamp mounting or even for extreme roof heights. Signo roof racks are preassembled and ready to fit – even technically inexperienced people are able to mount the carriers safely and precisely.

Key benefit

Due to the unique coded Atera key no additional tools are required to mount the system. At the same time - like any key system, the coded Atera keys have different codes, which protects the roof rack against theft.

general fitting system

SIGNO RAIL RACK

For all vehicles with open roof rails. To find the matching roof rack, please check out our product finder on our web site www.Atera.de or our printed application list.

- Preassembled and ready to use out of the box
- Extreme low height
- Top only 50 mm above the rail
- Longer or shorter bars are available should you change to a wider or narrower vehicle
- Loading width from 110 to 150 cm
- Compatible to rail sizes from 15 to 55 mm
- Rubber padded clamping
- Mounting with Atera coded key
- Protected against theft by the coded Atera key
- For steel bars, 32 x 20 mm
- For aluminium bars 57 x 30 mm

SIGNO CLAMPING RACKS

For fixation in the door area. To find the matching roof rack, please check out our product finder on our web site www.Atera.de or our printed application list.

- Preassembled and ready to use out of the box
- Made-to-measure
- Loading width from 110 to 150 cm
- Car paint protecting, coated clamping plates
- Protected against theft by the coded Atera key
- For steel bars, 32 x 20 mm
- For aluminium bars 57 x 30 mm

SIGNO FIX POINT RACKS

For cars with pre-installed fixing points. To find the matching roof rack, please check out our product finder on our web site www.Atera.de or our printed application list.

- Preassembled and ready to use out of the box
- Made-to-measure
- Loading width from 110 to 150 cm
- Car paint protecting, coated clamping plates
- Protected against theft by special screws
- For steel bars, 32 x 20 mm
- For aluminium bars 57 x 30 mm

SIGNO SPECIAL RACKS

For cars with integrated roof rails. To find the matching roof rack, please check out our product finder on our web site www.Atera.de or our printed application list.

- Preassembled and ready to use out of the box
- Made-to-measure
- Loading width from 110 to 150 cm
- Car paint protecting, coated clamping plates
- Protected against theft by the coded Atera key
- For steel bars, 32 x 20 mm
- For aluminium bars 57 x 30 mm

RAIL RACKS

NEW
AVAILABLE
FROM
AUGUST 2013

SIGNO RT

Powerful. Quiet. Efficient.

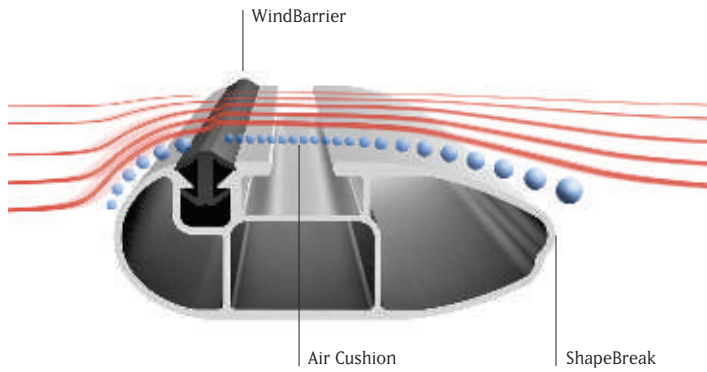

The Signo RT – the superior masterpiece with Aero Profile and the Signo RT foot derives from the fusion of aesthetics and function.

The Aero Profile Atera sets a new benchmark. The reduced air drag and fuel consumption are impressive as well as the further developed stability and safety.

It fits to any open roof rail, whether high, wide, thick or thin – handy for all vehicle brands and models. Stylish, elegant and subtly integrating with contemporary vehicle designs, the Signo RT fits perfectly on the roof, straight out of the box. The Atera Signo RT is the solid platform for anything you want to carry.

German quality standard: Typical Atera.

ATERA AERO PROFILE

An aerodynamic revolution – the Atera Aero Profile:

Instead of continuing the drop shape, Atera introduced at the trailing edge a special designed ShapeBreak, that controls the airflow in a favourable way. At the same time the ShapeBreak improves the stability of the cross bar and helps to keep its weight low.

The WindBarrier is a deflector for the airstream and is an important element, with its origin in aeronautics: The WindBarrier creates small swirls, forming an Air Cushion on the surface of the cross bar.

The ingenious purpose of the WindBarrier is the Air Cushion bridge for the airstream above the T-Slot that prevents the development of wind noise under all driving conditions. Even in unloaded condition it isn't necessary to cover the T-Slot.

ATERA SIGNO RT

The mounting to the roof rails is very simple: Just put the preassembled Signo RT on the roof rails. Adjust the width without tools by sliding the feet in the slot in the cross bar.

The fixation of the width and at the rail is done at the same time.

The perfect fastening torque is secured by the Atera torque hex wrench with T-handle.

The Aero Profile is compatible with all Atera accessories.

Signo RT roof bars

- Preassembled ready to use out of the box
- Perfect fit to many vehicles
- Atera torque hex wrench
- Payload 100 kg
- Cross bars: from 110 - 150 cm
- Theft protected by cylinder lock
- Clamping jaws with rubber
- For steel cross bars
- For Aero Profile

BICYCLE ROOF RACKS

GIRO AF

Focus on Know-How

With the Giro AF Atera proves how years of experience, combined with a profound knowledge about the latest technical processes and materials, was expertly transferred into the design process. The Giro AF, shapely and streamlined, looks good on the roof. The distinctive clamping system holds your precious and valuable bike securely. Suitable for wheels from 20 to 29 inches, with bulky MTB-tyres to thin racing bike tyres, and with strong or slim frames. Giro AF, the practitioner, awarded 2nd place in the ADAC test 2011 and Stiftung Warentest 6/2011.

Wheel Protection

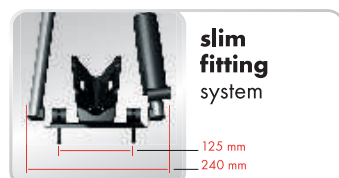

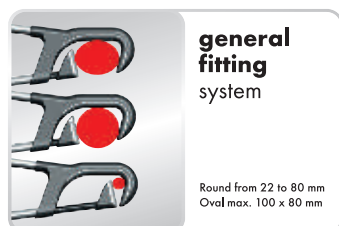

"Competence in professional cycling". It's appropriate for Atera to advertise this headline. Other suppliers pay little attention to the protection of the goods being carried, but Atera particularly cares for this. The Atera wheel holders are deliberately formed like wheel-chocks in order to eliminate the enormous lateral, drag and shear loads. Thus the wheels are protected against any damage – a small detail with a big effect.

GIRO AF

ITEM. NO.: 082 220

Bicycle roof rack made of matt anodized aluminium with automatic holding function.

- preassembled
- no pre-adjustment required
- no tools required
- Easily changed from right hand to left hand mounting
- double anti theft protection
- thick rubber coating to protect the bike frame
- comfort clamping system
- The quick release ratchet accommodate all common wheel sizes
- 2,9 kg lightweight
- for steel cross bars 32 x 22 mm
- for all aluminium cross bars
- City Crash tested
- TÜV tested

The Giro AF holds round frames from 22 to 80 mm and oval frames up to 100 x 80 mm. Holding function: After the bike comes to rest between the wheel holders, the bike leans against the open clamping head, holding itself in a vertical position before the clamp is shut.

RACING BIKE ROOF RACKS

GIRO SPEED

Pure Profession

The professional bicycle carrier with an impressive design for racing bikes or mountain bikes. With the Giro Speed everything is all about speed. Mounted within seconds, the fork fixing and the "Wheel Protection" wheel holder will put you in high-speed to the road.

Turn – push – ready!
The Giro Speed offers additional performance related features; important to professional bikers: lightweight and safety.

GIRO SPEED

ITEM No.: 082 221

Bicycle roof rack with fork fixation for racing and or mountain bikes also suitable for disk brakes.

- safe and quick fixation
- "Wheel Protection" wheel holder for the back
- anodized aluminium V-rail
- completely preassembled
- no pre-adjustment required
- no tools required
- anti theft protection
- for steel cross bars 32 x 22 mm
- for all aluminium cross bars
- City Crash and TÜV tested
- please consult the manufacturer before using with carbon forks
- not suitable for thru bold axles

wheel protection

city crash certified

GIRO FRONT WHEEL HOLDER

ITEM No.: 082 223

Accessory for the Giro Speed. Also suitable for bikes with disk brakes.

- theft retarding screws
- matt anodized aluminium
- completely preassembled
- for steel cross bars 32 x 22 mm
- for all aluminium cross bars
- not suitable for thru bold axles

BICYCLE REAR CARRIERS

LINEA

For a versatile range of vehicles

Linea is designed for vans, transporters, estates, ... vehicles with tailgates. Simple mounting without drilling.

The Linea sets consists of the carrier base and the vehicle specific mounting kit. The specific mounting kit ensures a perfect and simple fit.

At vehicle changes it is sufficient to replace the mounting kit, when the vehicle is within the same class. Linea can be extended with additional bike rails.

Linea shows bike transport competence in every detail. Wheel holders with "Wheel Protection". Lockable bike frame holders with rotating joints accommodate diameters from 30 to 80 mm. The frames and tubes are made of top quality anodized aluminium or stainless steel.

LINEA 2 FOR ESTATE / HATCH BACK

ITEM No.: 024 501

Carrier base made of anodized aluminium. Vehicle specific mounting kit required. To find the vehicle specific mounting kit, please check out our product finder on our web site www.Atera.de or our printed application list.

- width: 1,31 m
- completely preassembled
- supplied as standard with 2 bike rails
- two lockable distance holders
- wheel holder with quick fix
- coded key theft protection
- optional third bike rail

LINEA 2 VAN / TRANSPORTER

ITEM No.: 024 503

Carrier base made of anodized aluminium. Vehicle specific mounting kit required. To find the vehicle specific mounting kit, please check out our product finder on our web site www.Atera.de or our printed application list.

- width: 1,31 m
- completely preassembled
- supplied as standard with 2 bike rails
- two lockable distance holders
- wheel holder with quick fix
- coded key theft protection
- optional third bike rail

LINEA 3 VAN / TRANSPORTER

ITEM No.: 024 500

Carrier base made of stainless steel and anodized aluminium. Vehicle specific mounting kit required. Bike rails.

- width: 1,31 m
- completely preassembled
- supplied as standard with 3 bike rails
- three lockable distance holders
- wheel holder with quick fix
- coded key theft protection
- optional fourth bike rail

EXTENSION KIT FOR 3RD BIKE

ITEM No.: 024 550

Extension for Linea 024 501 / 024 503. Bike rail with lockable distance holder. Uses existing fixing points on the carrier base.

EXTENSION KIT FOR 4TH BIKE

ITEM No.: 024 551

Extension for Linea 024 500. Bike rail with lockable distance holder between the 3rd and 4th bike. Uses existing fixing points on the carrier base.

LINEA MOUNTING KITS

ITEM No.: 021 107 — 021 155

For all Linea carrier bases. The specific mounting kits ensure a perfect, simple fit.

- 2 supports with coated vehicle specific tail gate clamps
- anti-theft protection
- completely preassembled

LINEA ALL-IN-ONE SYSTEMS VOLKSWAGEN T4 AND T5,

Available with 2 or 3 bike rails. To find the vehicle specific system, please check out our product finder on our web site www.Atera.de or our printed application list.

The tailgate can be opened even when the carrier is loaded.

BICYCLE TOW BAR CARRIERS

STRADA

Strada bicycle carriers – the benchmark for weight and comfort.

Atera offers with the new Strada models a uniquely wide range of products with different price categories and features; all for mounting on the tow bar.

DRIVE-UP RAIL

ITEM No.: 022 635

Loading aid for all Strada DL, Strada Sport M and Strada E-Bike M carriers.

Strada Sport M 2

High-Performance carrier for 2 bicycles or 2 e-bikes.

Extendable to 3 bikes.

The tilting mechanism facilitates the fast access to the boot – whether loaded or unloaded. An ultra-light and stable bicycle carrier. Crash and double-lane change manoeuvre tested.

The optional drive-up rail enables the comfortable loading.

Test winner in the last major ADAC test 2011.

Strada Sport M 3

High-Performance carrier for 3 bicycles or 2 e-bikes.

Extendable to 4 bikes.

Features see Strada Sport M2

Strada E-Bike M

High-Performance carrier for 2 bicycles or 2 e-bikes.

Extendable to 3 bikes.

The distance between the bike rails is 230 mm, plenty of space for drive unit or battery.

Also the perfect choice for downhill bikes with wide suspension forks.

Features see Strada Sport M2

CARRYING BAG FOR VARIO 3
ITEM No.: 022 761

Wheel Protection

"Competence in professional cycling". It's appropriate for Atera to advertise this headline.

Atera particularly cares for the protection of the goods being carried.

The Atera wheel holders are deliberately formed like wheel-checks in order to eliminate the enormous lateral, drag and shear loads. Thus the wheels are protected against any damage – a small detail with a big effect.

Frame Protection

Also the protection of the bike frame is an important matter for Atera.

Dents and scratches are often the result of non-professional fixing solutions and / or the use of cheap, hard materials, which are not appropriate to absorb high forces.

Atera is doing more to protect valuable bikes: The lockable Strada distance holders can be swivelled and turned in each direction. For the theft protection the ratchet straps are enforced with a steel core while the bike frame itself is held soft and secure by soft rubber cushions.

Even the ratchet system itself is equipped with an overload protection: The desired tension is reached by using the ratchet – when the tension exceeds the desired level, the ratchet band automatically jumps to the next tooth. The optimal tension remains and is secured when the ratchet lever is locked. Consequently it is impossible to crush the bike frame.

wheel protection

pump fix system

folding concept

IN PREPARATION

DRIVE-UP RAIL, ITEM No.: 022 741

Loading aid for all Strada Evo and Strada Vario.

ROOF BOXES

CARGO, CERTO, FORMULA

Traveling in top form.

Expand your transport capacity with attractive Atera roof boxes.

Enjoy the added value during the transport of all your items you don't want to miss –comfortable, dry and protected against theft.

All roof boxes are compatible to steel and aluminium cross bars.

Atera roof boxes are TÜV-approved, city crash certified and come with a warranty of 5 years.

Dual-Side Opening

Mount them on the left of the roof, in the middle, or on the right.

Atera roof boxes offer all-round comfort due to the dual side opening*.

*Except Cargo 810 and Certo 410

Lowered Base

The lowered base not only provides additional space, but also the visual integration to the car and the drag coefficient show the value of Atera Certo roof boxes.

Stainless Steel Diffusor

More than an eye-catcher: The diffusor makes the aerodynamics of the Atera Formula series almost perfect.

Dynamic Opening

Innovative, safe and comfortable. The knee lever mechanism supports the opening and closing of the box.

Quick-Fix

Quick and tool-free mounting with the patented fitting systems. Compatible with steel and aluminium cross bars

Easy-Fit:

1. Put the box on the roof
2. Adjust to the distance of the cross bars
3. Insert bracket from below and close EASY-FIT fastener- a half turn is sufficient.

Master-Fit:

1. Put the box on the roof
2. Adjust to the distance of the cross bars
3. Turn the MASTER-FIT and press the red cap – secured!

Premium-Fit:

1. Put the box on the roof
2. Adjust to the distance of the cross bars
3. Turn Premium-Fit to the noticeable clicking

ROOF BOXES

The Atera Cargo entry-level models are functional & practical. Atera Cargo boxes are available in two sizes and offer all you need for a relaxed journey.

- Highest safety.
- Easy mounting due to the Easy-Fit System.
- Knee lever mechanism that supports the opening and closing.
- Integrated steel rail for safe fixation.
- Impact resistant ABS / ASA material.
- Lowered base for outstanding aerodynamics.
- Lowered distance to the roof to reduce wind noise.
- Lockable.
- Low weight.
- 5 years warranty.

The Atera Certo quality. Due to the patented Master-Fit the mounting of the box is child's play. Four Sizes – the perfect box for every purpose.

- Reduced warming due to the silver-coloured lid.
- Highest safety.
- Master-Fit
- Knee lever mechanism that supports the opening and closing.
- Integrated steel rail for safe fixation.
- Impact resistant ABS / ASA material.
- Lowered base for outstanding aerodynamics.
- Lowered distance to the roof to reduce wind noise.
- Central locking system.
- Low weight.
- 5 years warranty.

Features (all): Cargo lashing straps, lashing lugs, dynamic opening system, central locking, quick fix system to roof bars

The exclusive Atera Certo Design roof boxes. For a dazzling appearance – with glossy surface. Optimised aerodynamics combined with excellent loading capacity. The dual side opening lid guarantees the highest loading comfort. Additional features:

- Brilliant glossy surface.
- High quality ABS / PMMA material with highest UV-Resistance.
- Highest safety.
- Knee lever mechanism that supports the opening and closing.
- Integrated steel rail for safe fixation.
- Outstanding mounting comfort with Master-Fit system.
- Lowered base for outstanding aerodynamics.
- Dual side opening.
- Central locking system.
- Low weight.
- 5 years warranty.

Atera Formula, the highest level in roof box aesthetics.

The silver carbon surface shows from afar the bright characteristics of these high-end series. The streamlined shape guarantees a perfect aerodynamic and low noise emission. The diffusor ensures that the aerodynamics of the Atera Formula series is almost perfect. More than an eye-catcher:

- Unique glossy surface with silver carbon look
- High quality ABS / PMMA material with highest UV-Resistance.
- Knee lever mechanism that supports the opening and closing.
- Integrated steel rail for safe fixation.
- Excellent mounting comfort due to the Premium-Fit system with torque control.
- Lowered base for outstanding aerodynamics.
- Dual side opening.
- Central locking system.
- Low weight.
- 5 years warranty.

For easy mounting in the T-Slot of aluminium cross bars. Theft-proof.

ROOF BOX LIFT

ITEM No.: 082 195
Ideal for the storage of the roof box, e.g. in a garage. Simple mounting.

SKI-/+ SNOWBOARD- CARRIERS

NOVA

In January 2012 the Auto Express rated the Atera Nova Ski Carrier as Best Buy: „Best buy: There’s a quality feel to these Atera carriers – the only ones on test to offer height adjustment for both square and aero bars. They’re easy to put together, with bolts securing the neat twist-and-grip clamps. Everything you need is in the box, including a T-handle hex wrench. Loading skis is simple, too, thanks to the big release button, sprung arm and snap-shut lock...”

Read more: www.autoexpress.co.uk

At the highest level.

Clear lines with the highest levels of user-friendliness, form and durability. For winter sports enthusiasts the Nova is a design classic that will prove itself again and again.

With its straightforward handling – even with thick gloves – the winter fun starts while loading. Simply Atera.

NOVA 4

ITEM No.: 082 724
Carrier for
1 Snowboard und 1 pair of skis
Or for up to 4 pair of skis

- **Width outside:** 570 mm
- **Loading width:** 400 mm
- for all roof racks

Those who follow the media will repeatedly come across positive reviews and recommendations for Atera products.

It might not say Atera, but many car manufacturers' own-brand equipment comes from Atera. Great functionality, continuous development and the respected production is highly appreciated by many of the leading vehicle manufacturers.

Atera products are designed and made in Germany. Manufactured in accordance to DIN ISO 75302, TÜV tested.

Atera products come with three years warranty on material and function. Five years on roof boxes.

According to the EU regulation DIN EN ISO 1135 all synthetic parts are completely recyclable. Our production meets the requirements of the German environment protection rules and is constantly monitored in order to ensure the compliance.

A comprehensive quality management system guarantees not only top quality products, but also ideal conditions for deliveries and trade.

Environmental Management in accordance to System IAF. ISO 14001:2004 in development, manufacturing & sales.

Bike carrier recommendation for the transport of heavy e-bikes.

Professional design department based in Leutkirch im Allgäu, Southern Germany.

All Atera Certo Design roof boxes come with a five years warranty

Designed in Leutkirch im Allgäu – innovative, functional and award winning.

Carrier and load are secured during frontal crash at 30 km/h and remain on the vehicle.

Atera products come with a three years warranty on material and function.

Atera wheel holders are formed like wheel-chocks and secure a firm hold – even during exceptional driving manoeuvres.

Atera products are designed and manufactured in accordance to DIN ISO 75302 – TÜV tested.

Wheel holders and distance holders are equipped with quick release ratchets – these ensure additional tensioning force.
