**NEW**

## DESCRIPTION

Multifunction electronic starter, power supply and tester, with LiFePO4 lithium battery for 12V/24V starting of cars, vans, small boats, lorries etc.

It performs control tests on the battery: voltage at terminals, starting capacity (CCA) and operational check of the vehicle alternator.

The OVER RIDE function allows starting in emergency conditions when battery is missing (or completely down).

It is a stable and reliable power supply source for battery charges (SUPPLY function).

Robust and compact, it is equipped with high intensity LED light.

Protection against: polarity reversal, short-circuit, overvoltage (incompatible battery voltage), undervoltage (cut-off voltage), overcurrent, overheating, under-temperature, accidental contacts, alternator return currents.

Complete with starting cables and wall charge.

## TECHNICAL DATA

<b>CODE</b>	CODE 829528	<b>V<sub>PH</sub></b>	CHARGE MAINS VOLTAGE 1ph 100 - 240 V		CHARGE MAINS FREQUENCY 50 / 60 Hz
<b>C</b>	BATTERY CAPACITY 40000 mAh	<b>START</b>	STARTING VOLTAGE 12 / 24 V	<b>A<sub>START</sub> MAX</b>	MAX STARTING CURRENT 12000 / 6000 A
<b>+</b>	225 / 200 Ah	<b>IP</b>	PROTECTION DEGREE IP43	<b>LxWxH</b>	DIMENSIONS (LxWxH) 15,5 x 23,4 x 31,8 cm
<b>kg</b>	WEIGHT 4,580 kg	<b>BAR CODE</b>	EAN CODE 8056590377017
