

Flux Isofix eXT

ECE R129/03, 76–150 cm

Our Flux Isofix eXT – the perfect combination of safety, comfort and flexibility.

The i-Size child car seat offers a 14-position height-adjustable headrest, a removable comfort insert and an automatic 5-point harness system that grows with the child. It is suitable for small passengers up to a height of 120 cm and a maximum weight of 23 kg. The magnetic holders for the shoulder straps create additional comfort when getting in and out. Alternatively, it is possible to switch to securing with the vehicle's 3-point harness from a height of 100 cm; the 5-point harness can be easily stowed in the child car seat.

A real highlight: Special protectors on the headrest provide increased side impact protection and make riding in the Flux Isofix eXT particularly safe. In addition, an integrated sensor assists in the correct installation of the seat.

Incidentally, the childhood hero can be installed using Isofix in combination with top tether and, from 100 or 120 cm, with the vehicle's 3-point harness. We wish you a safe journey!

- Easy and safe installation with Isofix and top tether (76–120 cm)
- Special feature: Integrated sensor for correct installation (battery operated)
- Automatic 5-point harness system for children up to a height of 120 cm and a maximum body weight of 23 kg
- Easy to use with magnetic holders for shoulder straps
- Special side impact protection through enlarged side parts and protectors on the headrest (SIPS PROTECT)
- Additional slide protector for increased side impact protection
- Belt and buckle pads
- Individually adjustable Isofix connectors
- 14-position height-adjustable head support
- Removable comfort insert
- Additional removable head support cushion
- Large ergonomically shaped seat
- Optimal belt run due to belt guides for the size class 100–150 cm
- Simple to convert for use in the 100–150 cm size class: 5-point harness is stowed in the child car seat without removal
