

EV Charging Extension Cable - 32A Single Phase T2

A 32A single phase extension cable, designed for use with a Type 2 EV charging cable, to give extra length and allow for the plug to comfortably reach the BEV (Battery Electric Vehicle) or PHEV (Plug-in Hybrid Electric Vehicle) in need of charging. Suitable for use with 220/230V home wall box chargers, but can also be used in public charge points, with a maximum power output 7.4kW. Supplied in a zip-up carry-case so that it can be kept safely and tidily in the vehicle when not in use.
