## FITTING GUIDE

---

1. Remove and disconnect the original head unit.
2. Connect the 12 way molex connector of the head unit patch lead (supplied separately) to the interface.

3. Connect the opposite end of head unit patch lead to the head unit steering wheel control input on the back of the aftermarket head unit. This may be a 3.5mm jack plug or a wire input depending upon the head unit brand being fitted. Please see the head unit installation manual for further information on where to connect.

**Important Note: This step must be completed before connecting power to the interface. Failure to do so may result in no steering wheel control function.**

4. Connect the 14 way molex connector to the interface.

Note: When installing a Sony head unit, disconnect the interface, open the box and ensure Dipswitch 4 is set to "Off"

FITTING GUIDE

5. Connect the male power/speaker ISO harness to the female power/speaker ISO harness from the aftermarket head unit.

For aftermarket head units which do not have an ISO connector the interface uses the following wiring colours:

Wire Colour	Function
Yellow	Permanent 12V
Black	Ground
Red	12V Ignition
Orange	Illumination
Blue	Antenna Remote
Pink	Speed Pulse
Green	Park Brake
Purple	Reverse

Wire Colour	Function
Purple	Right Rear Speaker +
Purple/Black	Right Rear Speaker -
Green	Left Rear Speaker +
Green/Black	Left Rear Speaker -
Grey	Right Front Speaker +
Grey/Black	Right Front Speaker -
White	Left Front Speaker +
White/Black	Left Front Speaker -

6. Connect the female vehicle specific connector to the male vehicle connector. Test head unit for correct operation.
